

SHAFT LIGHTING

Shaft Lighting According To
DIN EN 81

93

SHAFT LIGHTING ACCORDING TO DIN EN 81

CONCEPT: Shaft lighting system with different protection classes for new systems or retrofits. Tailored solutions that are quick and cost-effective to install.

- Mark out the first light/wall mounting plate
- Drill
- Dowel into place
- Insert cable
- Move on to next light
- ... all done

BENEFITS: Quick installation of lights • Quick laying of cables (no need for cable ducts, brackets, and so on) • Easy-to-insert connecting cables • Different all-in-one sets in accordance with IP 20, IP 65 • Components can be ordered individually

DETAILS: • All-in-one sets for different shaft heights in accordance with IP 20, IP 65 • Shaft lighting including illuminant, pluggable as • IP 20 tubular lights with a protective tube (21 Watt) • IP 65 moisture-proof lighting (36Watt) with a full plastic cover

- Feed cable from machine room to shaft lighting (10 standard) Pluggable connection cables (2 m standard) from light to light

OPTIONAL: • Pit control unit with, for example, emergency stop, light sensor, emergency call button and socket, fully wired • Tailored connecting cables from the machine room switch cabinet to the pit control unit (10 m + height of shaft) • Halogen-free versions available (not IP 20)

IP 20 tubular light

Moisture-proof light with 3-pin feed cable for IP 65
